

Thriving together

2017 Sustainability Report highlights

“Sustainable development at Swire Pacific is not viewed simply as a cost or a set of good intentions. It is a strategic imperative for our businesses and part of our overall approach to building long-term value for our shareholders”

Merlin Swire, Chairman, Swire Pacific Limited

The Swire Pacific 2017 Sustainability Report showcases our continuing efforts to make Swire Pacific more sustainable in our everyday operations, for the people with whom we work and the communities in which we operate.

Back in 2016, we introduced our business-wide environmental sustainability strategy, SwireTHRIVE, and we continue to build on our efforts for 2017. We have established working groups dealing

directly with environmental issues and set near- and long-term targets for carbon and waste reduction. We continue to invest in our people and communities, and develop responsible environmental and social initiatives that make Swire competitive and resilient for a thriving future.

These highlights are a snapshot of our many achievements in working towards a thriving, sustainable future across our business.
